

IN THIS ISSUE:

1. A message from our CEO
2. The upgrade and expansion of the countywide flood early warning system
3. A regional partnership to protect the common shoreline of Burlingame, Millbrae, and SFO
4. Other regional planning efforts to enhance resilience around the Bay

A message from our CEO:

As we assess the impact of last night's storm, the first major one of 2021, I am pleased to send you the second edition of the newsletter of the San Mateo County Flood & Sea Level Rise Resiliency District, also known as **OneShoreline**.

In this issue we briefly highlight:

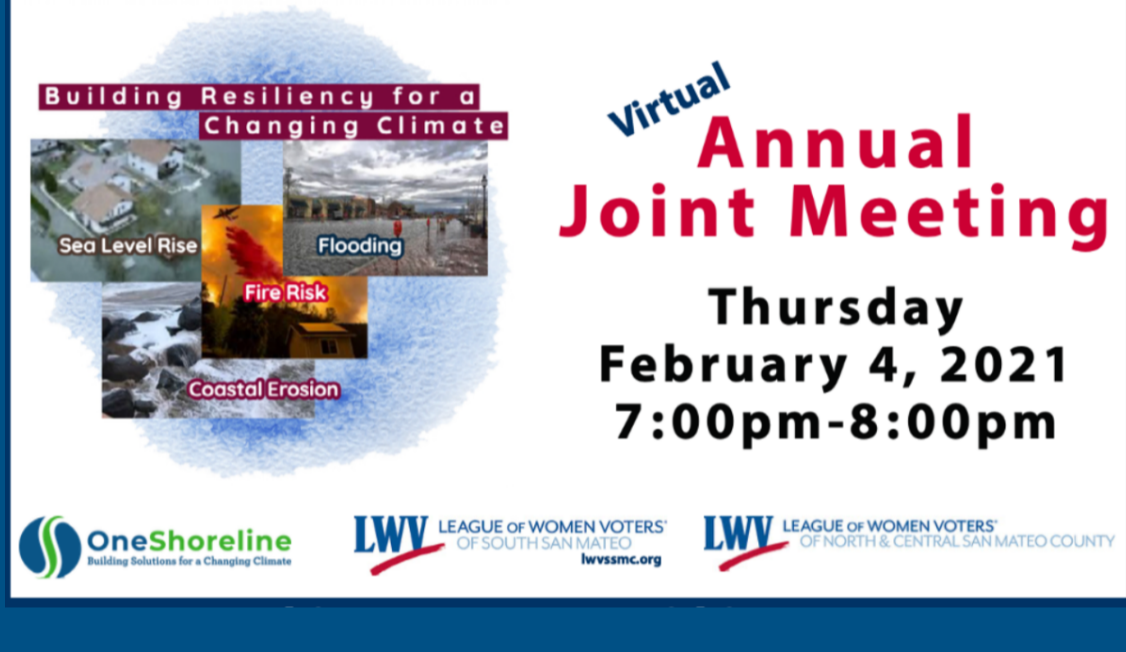

- our project to expand and upgrade the countywide Flood Early Warning System to provide emergency responders and the general public with actionable information during major storms, and
- our first regional project to protect against creek and sea level rise flooding, by connecting and aligning the individual efforts of Burlingame, Millbrae, and SFO.

Also, we are excited to announce a program of public forums in 2021 on climate change risk and resiliency in partnership with League of Women Voters chapters throughout San Mateo County. The first forum in this series, scheduled for February 4, 2021, 7:00 PM - 8:00 PM, will include brief virtual presentations by San Mateo County Supervisor and OneShoreline Board Chair Dave Pine and myself, followed by public discussion moderated by Ann Draper of the League of Women Voters. Future forums will focus on specific regions of the Bay shoreline, Pacific Coast, or on wildfires. Information on how to register for and access this event is at the link below.

Sincerely,

Len Materman
CEO

Upcoming Events

Virtual Annual Joint Meeting
Thursday
February 4, 2021
7:00pm-8:00pm

Register for the event [here](#). All registered will receive a Zoom link for the event. In addition, the meeting's livestream and post-event recording will be accessible [on YouTube here](#).

Enhancing the Countywide Flood Early Warning System as the First Storm of the Year Arrives

The District spearheads the expansion of a broad stream and precipitation monitoring network, beginning with the installation of permanent and temporary gauging equipment on Colma, San Bruno, San Mateo, and Belmont Creeks, and Atherton Channel.

Aligning and Advancing Adjacent but Distinct Efforts to Address Sea Level Rise Along the Bay Shoreline of Burlingame, Millbrae, and SFO

The District is partnering with the Cities of Burlingame and Millbrae, along with SFO, to protect billions of dollars in assets on the Millbrae-Burlingame shoreline from flooding due to storms and sea level rise.

Other Regional Resiliency Planning Happening Around the Bay

Bay Adapt

Facilitated by **BCDC** in partnership with a broad range of **Bay Area organizations**, Bay Adapt is an initiative to establish guiding principles and a Joint Platform that will facilitate a regionally collaborative response to a rising San Francisco Bay.
