

## **Request for Service Qualifications for As-Needed Routine Maintenance**

### **Responses to Questions Regarding the RFSQ 1 — January 30, 2026**

**Q1 For Agreements awarded through this RFSQ what will be the selection process to authorize work?**

A1 OneShoreline will issue Contract Service Orders (CSOs) on an as-needed basis. Pursuant to issuance of CSOs OneShoreline will solicit brief proposals to be responsive to requested services. Solicitation site visits will be available but may not be required dependent on scope and complexity of services requested. Brief proposals are expected to include confirmation of capacity to complete work to required specifications, cost, availability, and what crew is proposed for specific requested services. Evaluation and selections will be made based on best value for cost, including consideration of cost, experience, demonstrated understanding of scope, and availability. Once selection has been made proposers will be notified and a CSO will be issued including description of services needed, costs, required deliverables, and schedule of performance. This process is intended to streamline procurement respecting OneShoreline and Proposer time and potential urgency of requested services.

**Q2 Will award of Agreements through this RFSQ be based only on proposals? Will there be interviews?**

A2 Agreements through this RFSQ will be awarded based only on proposals and information provided, including references. No interviews are scheduled for this RFSQ.

**Q3 Is there a license requirement to submit the Statement of Qualifications?**

A3 The Minimum Qualifications Application requires a valid and current California Class "A" Contractor's License.

**Q4 What is the size and frequency anticipated for CSOs? Will they be packaged together?**

A4 OneShoreline anticipates Agreements through this RFSQ will be issued for a 3-year term with options to extend up to 5 years. Over this period CSOs will be issued on an as-needed basis. However, OneShoreline will endeavor to package requests together as reasonably feasible to minimize administrative demands for OneShoreline and Proposers. For example, general routine maintenance for Colma Creek has historically been issued under a single annual request for services. Value of Agreements may be up to Three Million Dollars. Individual service requests such as targeted debris removal in channel may exceed One Hundred Thousand Dollars.
